I'm sure you've thought of this already (and since your ATK email and your personal email are both google based, I'm sure this has already been done via the Cloud or something). Still, just in case -- you want to be sure that you have all your ATK business contact info accessible via your personal gmail account, too.

Also, I'm not sure if Christine has your work related contact info (things that you wouldn't have) but if so, you want to get all of that stuff too. I don't know if Christine knows anything or not (you asked me to keep everything confidential. I've been very careful about that ), but she may have info or lists etc. that you might want (and faster) because of this latest development (I truly can't believe they would go through with it , but who knows).
